

Next phases

This section outlines the upcoming phases of the project and the main activities planned for each stage.

Phase 3

Phase 4

Phase 5

Phase 4: Solution Design & Specification

The checklist below outlines the recommended steps for this phase. Actions will be enabled when the phase becomes active.

Checklist

Define information architecture and navigation structure

Structure how users interact with the system or access functionality

Design core user flows

Define how users complete key tasks or interact with the system

Create low-fidelity wireframes

Create low-fidelity representations (diagrams, sketches, models)

Iterate and refine designs

Improve flows and layouts based on internal reviews or early feedback.

Develop high-fidelity screens or prototypes

Develop detailed representations or prototypes suitable for validation.

Ensure consistency and accessibility considerations

Check alignment with usability principles and accessibility basics.
