Project Overview

Review the project context, timeline, and constraints, coordinate contributors, and document all the steps to ensure transparency and continuity throughout the project lifecycle.

UniApp

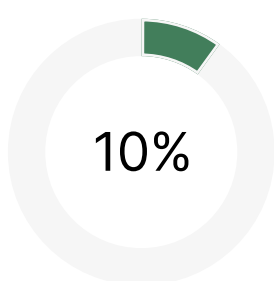

Overview Team

Project Description

This project focuses on the development of a university-owned mobile application intended to support students in managing long-term academic projects, such as theses and research-based coursework.

Project progress

Current phase:
User Research
Project deadline date:
10 Jul 2026

Target User

Edit in dedicated section

Primary

University students involved in research-oriented or project-based courses

Secondary

Academic supervisors

Phases

Phase 1: Problem Definition & Context

Completed

20 December 2025

This phase focuses on understanding the project context, target users, and problem space before any research activities are conducted. It establishes a shared understanding of why the project exists, who it is for, and which constraints shape the design space.

Define the project context

Clarify the institutional, academic, and technical context in which the project operates.

Define the target users

Identify who the project is primarily designed for and who is out of scope.

Identify the core problem space

Articulate the main problems the project intends to address, without proposing solutions.

Define project goals and success criteria

Clarify what the project aims to achieve from a user and academic perspective.

Identify constraints and assumptions

Document known limitations and assumptions that shape the project.

Define expected outcomes

Clarify what this project is expected to produce by the end.

See documentation

Phase 2: User Research

Current phase

10 Feb 2026

Phase 3: Ideation & Conceptualization

27 Mar 2026

Phase 4: Solution Design & Specification

18 May 2026

Phase 5: Testing & Transfer

10 Jul 2026
