

Next phases

This section outlines the upcoming phases of the project and the main activities planned for each stage.

- Phase 3
- Phase 4
- Phase 5

Phase 5: Testing & Transfer

The checklist below outlines the recommended steps for this phase. Actions will be enabled when the phase becomes active.

Checklist

Define testing goals and success criteria

Clarify what aspects of the design need validation and why.

Prepare usability testing materials

Create test scenarios, tasks, and supporting documentation.

Conduct usability testing sessions

Observe users interacting with the prototype to identify issues and strengths.

Analyze usability findings

Identify usability problems, user feedback patterns, and improvement opportunities.

Iterate designs based on test results

Refine the solution to address critical issues uncovered during testing.

Document design decisions and outcomes

Record rationale, limitations, and final design choices for transparency and transfer.

Support knowledge transfer and handover

Prepare materials (documentation, prototypes, guidelines) to support implementation or further development.
