Preparing for interviews

Proper preparation is critical for collecting meaningful data.

1. Define the research objective

- What do you want to learn?
- How will the insights be used later?

2. Identify relevant participants

- Users, stakeholders, or domain experts
- Participants should reflect the real context of use

3. Create an interview guide

- Start with warm-up questions
- Move from general to specific topics
- Avoid leading or suggestive questions

3. Create an interview guide

- Start with warm-up questions
- Move from general to specific topics
- Avoid leading or suggestive questions

4. Address ethical considerations

- Inform participants about the purpose of the interview
- Obtain consent for recording and data usage
- Ensure confidentiality and data protection
