

Research & Discovery

Interviews

Interviews are a qualitative research method used to explore users’ needs, motivations, experiences, and expectations through structured or semi-structured conversations.

Phase: **User Research** Effort level: **Medium**

After the interview: making insights usable

Interviews only create value when insights are synthesized and shared.

Common follow-up activities:

- Transcribing or summarizing notes
- Identifying recurring themes
- Connecting insights to research questions
- Feeding results into synthesis methods (e.g. affinity mapping)

Without synthesis, interview data risks remaining anecdotal.
