

Consent form for participants of a user interview on the Integration of UX/UI Principles into Research-Driven Technological Projects in Mexico

Name, first name of the participant: Analine Avendaño Pliego

Information for Participants

Objective of the interviews

This interview is part of the Master's thesis titled "Integrating UX/UI Principles into Research-Driven Technological Projects in Mexico: A Framework for Effective Technology Transfer" conducted by Daria Lauri, Master student in User Experience Design at Technische Hochschule Ingolstadt (THI), Germany.

The purpose of this research is to explore how UX/UI design principles can be effectively integrated into research-driven technological projects in Mexico to improve their transition from laboratory research to real-world applications. The interviews aim to understand the experiences, challenges, and perspectives of researchers, UX professionals, and project participants involved in such projects.

Procedure of the interviews

The interview will take approximately 40–60 minutes. It will be conducted in person or online, depending on logistical convenience. With your consent, it will be audio-recorded for accurate data collection. All recordings will be securely stored by the researcher and will only be accessible to Daria Lauri and her academic supervisors:

- **Main supervisor:** Prof. Dr. Christian Sturm, Technische Hochschule Ingolstadt (THI)
- **Second supervisor:** Prof. Dr. Simon Nestler, Technische Hochschule Ingolstadt (THI)
- **Collaborator:** Prof. Dr. Juan Manuel González Calleros, Benemérita Universidad Autónoma de Puebla (BUAP)

The recordings will be transcribed and anonymized. Any identifying information (such as names or institutional affiliations) will be removed. All recordings will be permanently deleted three months after the completion of the thesis, and no later than two years after the interview date.

In addition to the interview, the researcher may review certain materials related to your research project, such as interview or experiment materials (e.g., questionnaires, protocols, or anonymized data). The purpose of this review is to gain a deeper understanding of the research process and how UX/UI principles are integrated into it. All reviewed materials will remain strictly confidential and will be used solely for academic research purposes. Any identifying or sensitive information will be excluded from analysis and publication.

Right of withdrawal

Your participation in this study is entirely voluntary. You may decline to answer any question or withdraw from the interview at any time without providing a reason and without any negative consequences. If you have any questions or wish to withdraw, please contact:

Privacy policy

All personal information is kept strictly confidential. Only the supervisors directly responsible for this work have access to the recorded interview data until it is deleted.

The legal basis for the data processing associated with these interviews is your consent - requested below - in accordance with Art. 6 para. 1 lit a DSGVO and Art. 6 para. 1 lit e. DSGVO in conjunction with Art. 2 para. 1 sentence 1 BayHSchG for research purposes.

According to the General Data Protection Regulation, you have the following rights:

- Insofar as personal data is processed, you have the right to receive information about the data stored about you (Art. 15 and 89 DSGVO).
- If incorrect personal data is processed, you have the right to have it corrected (Art. 16 and 89 DSGVO).
- If the legal requirements are met, the participant may request the deletion or restriction of processing and object to processing (Art. 17, 18, 21 and 89 of the GDPR).
- If the participant has consented to the data processing or if there is a contract for data processing and the data processing is carried out with the help of automated procedures, there may be a right to data portability (Articles 20 and 89 of the GDPR).
- Should the data processing be based on consent, he/she has the right to revoke this consent at any time (Art. 7 (3) DSGVO). The revocation must be sent in writing to Daria Lauri (lal2933@thi.de).
- Furthermore, there is a right of appeal to the competent supervisory authority.

Declaration of consent under data protection law

I agree to participate in the interviews. I am aware that answers from the interviews will be recorded by audio and that the statements will then be written down anonymously, that they will be used to research how to support beginning freelancers and that they may also be published in this context. The recorded audio excerpts will be permanently deleted three months after completion of the thesis, but no later than after 2 years.

I agree that the named supervisors may view the recorded audio data and video recordings. I also agree that the researcher may review materials related to my research project, such as interview or experiment materials (e.g., questionnaires, protocols, or anonymized data), for the sole purpose of academic analysis within the scope of this study. These materials will be treated confidentially and will not include any personal or identifying information.

Consent

Audio recordings

☒ Yes

☐ No

Review of research materials (e.g., interview or experiment materials, questionnaires, anonymized data)

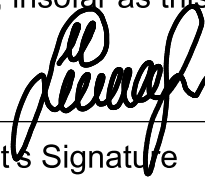

☒ Yes

☐ No

I can revoke this consent at any time: The revocation must be sent in writing to Daria Lauri (lal2933@thi.de). The revocation of consent does not affect the lawfulness of the data processing carried out on the basis of the consent until revocation. This data may be further used for research under the conditions of Art. 89 DSGVO, insofar as this is necessary.
